Trusted AI, Cyber Operations, and Mission-Ready Workforce Development

About Us

For nearly 20 years, IntelliGenesis LLC[®] has partnered with Defense, Intelligence, and Federal organizations to develop, operationalize, and sustain AI, cyber, and engineering capabilities that strengthen national security and prepare the workforce of the future.

Core Capabilities:

Cyber Operations/Warfare

Intelligence-Driven Cyber Threat Protection;
Offensive & Defensive Cyber Ops

AI & Machine Learning

AI/ML for Predictive Analytics, NLP,
and Autonomous Mission Systems

Data Analytics

Predictive Analytics and Data
Engineering for Government Missions

Workforce Development

Transforming Classroom Knowledge
into Operational Success

Mission Engineering

Engineering Operational Efficiency Through
Secure, Scalable Mission Architectures

We Partner With:

- Government Labs & Agencies
- Prime and Sub Defense Integrators
- Academia
- Research Institutions

Why IntelliGenesis?

- ▶ *19 Years in Business*
- ▶ *Operational AI and Cyber Products and Services*
- ▶ *AI Workforce Development Provider for National Security Organizations*
- ▶ *Prime Contractor*
- ▶ *50,000+ Professionals Trained*
- ▶ *CMMC Level 2 Certified*

Contract Vehicles:

- ✓ OASIS+
- ✓ GSA Multiple Award Schedule
- ✓ AI Talent 2.0
- ✓ MDA Shield

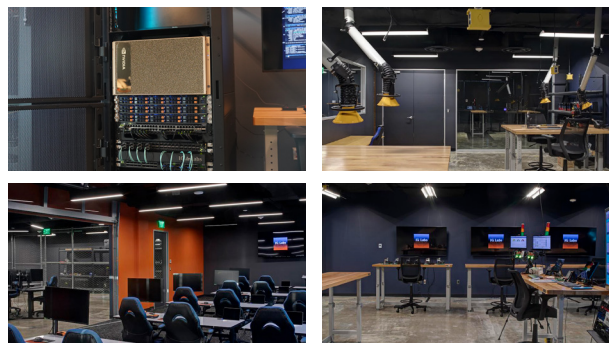

Acquisition Pathways:

- ✓ Tradewinds Solutions Marketplace
- ✓ PlatformOne Solutions Marketplace
- ✓ SBIR Phase III

IG Labs® – AI R&D and Rapid Prototyping

IG Labs accelerates the transition of emerging technologies into operational mission capabilities through AI research, rapid prototyping, cybersecurity innovation, and applied experimentation.

Product	Description
 Powered by IntelliGenesis LLC®	<i>AI-enabled network detection</i>
 Awardable Platform One	<i>Automated container and software vulnerability analysis</i>
	<i>Secure generative AI for classified and disconnected environments</i>

Services:

- AI/Deep Learning & Agentic AI
- On-Prem AI Compute & Edge Infrastructure
- Data Science/Advanced Analytics
- Generative AI & Large Language Models
- Rapid Prototyping & Fabrication
- Defensive Cyber Solutions

IntelliCademy™ – 50,000+ Trained

IntelliCademy develops mission-ready professionals through hands-on, skills-focused training built for real-world operational success. Our programs transform knowledge into measurable workforce capability through practical application, immersive labs, and mission-driven problem solving.

- **50,000+ National Security Professionals Trained Since 2013**
- **AI/ML Certifications**
- **AI Workforce Development**
- **DoD 8140 Alignment**
- **Custom Mission Training**

Defense-Grade Network Detection and Response

CYBERSPAN delivers transparent AI, real-time anomaly detection, and true data privacy for small and mid-sized businesses, without the need for a dedicated cyber team. With flexible deployment options, explainable alerts, and a metadata-only design that safeguards sensitive data, CYBERSPAN® makes it simple to detect threats early, reduce risk, and stay secure.

Organizations with limited cybersecurity staff can deploy CYBERSPAN to continuously monitor network activity, identify anomalies, and prioritize threats without exposing sensitive data to third party platforms.

Why CYBERSPAN®?

- Agentless deployment
- Explainable AI alerts
- Metadata-only architecture
- Protects sensitive data
- No dedicated cyber team required
- Flexible cloud or on-prem deployment
